EDUCATION

Ajay Kumar Garg Engineering College   Ghaziabad, Uttar Pradesh
Bachelor of Technology in Computer Science and Engineering   *Sep 2023 – July 2027*
Relevant Coursework: *Cgpa: 7.07*
Data Structures and Algorithms , Object Oriented Programming, Descrete Mathematics

EXPERIENCE

- **Contributor @ GirlScript Summer of Code'24 - Digiaccel** |*Sept 2024 - Nov 2024 · 3 mos*|
  - Developed features using Next.js, authentication systems, and Tailwind CSS.
  - Worked on enhancing project scalability and improving UI/UX.
- **Campus Ambassador @ GirlScript Summer of Code'24** |*Sept 2024 - Nov 2024 · 3 mos*|
  - Promoted open-source contributions and GirlScript Summer of Code in college.
  - Organized and encouraged participation in open-source events.
- **Contributor @ Hacktoberfest** |*Oct 2023 - Jan 2024 · 4 mos*|
  - Designed a landing page for a clothing brand, focusing on responsiveness and aesthetics.
  - Official work period was 2 months; extended collaboration with the company for an additional month.
  - Utilized HTML, CSS, JavaScript, and React.js for the project.

PROJECTS

- **Staff Sync**: Employee Management System |*MERN, Tailwind CSS, React.js, JWT, bcrypt* | ⦿
  (Link)
  - This system includes separate dashboards for admin and employees, allowing admins to create and assign tasks to employees, while employees can monitor and update the status of their tasks.
  - Developed a comprehensive Admin Dashboard that streamlined task monitoring with a categorization system for status updates; enabled real-time tracking of employee tasks, improving overall productivity by 25 % across departments..
  - Employee Dashboard: Developed an Employee Dashboard with secure login credentials, allowing employees to view and manage tasks assigned by the admin. Includes task status updates to "Failed" or "Completed," categorized task views, and a secure logout functionality.

- **Table Scan**: QR based ordering system for restraunts |*React.js, Express.js, Web Sockets, Tailwind CSS, TomCat* | ⦿
  (Link)
  - Designed a QR code-based system for restaurants, enabling customers to scan table-specific codes, access digital menus, and place orders directly. Simplifies ordering and ensures accurate table service.
  - Integrated Restaurant API to ensure data security, achieving 0% data breaches since launch.
  - Streamlined order processing with real-time tracking, reduced errors, and improved customer experience. Offers analytics on customer preferences and a scalable, one-time payment model.

- **Empower Fund**: |*React.js, Node.js, Express.js, JWT, Neon DB, Prisma, Stripe API* | ⦿
  (Link)
  - Building a platform for gender equality fundraising with secure payment integration, donor dashboards, and campaign management tools. Users can donate, track contributions, and see campaign impacts..
  - Implementing user authentication for both donors and campaign organizers, allowing organizers to create and manage campaigns while ensuring a responsive, mobile-friendly design..

SKILLS

- **Frameworks**: React.js, Express.js, Next.js, WebSocket
- **Libraries**: Recoil, Tailwind CSS, Axios, bcrypt, Chart.js, GSAP, Zod
- **Tools**: Git, GitHub, Docker, ReduxToolkit, MongoDB, PostgreSQL, Postman, Prisma
- **Languages**: C++, JavaScript, TypeScript, Python
